Large scale beach replenishment to raise the beach levels and boost sand dune buffers using sand from an external source. The government will also restore sand that is currently being lost each year.

Location: West Beach/Henley Beach South
Commencing: 2019/20

New sand recycling pipeline to recycle the large sand volumes required to maintain West Beach and Henley Beach South. The pipeline will also reduce the need for trucks on the roads and beaches in the future.

Location: From Semaphore to the Torrens outlet at West Beach
Start date: 2021/22
Expected completion: 2022/23
