Seagrass restoration project timeline

The biggest seagrass restoration project ever done in Australia

Summer 2018/19 Collecting fruits from beach for Posidonia species trial

Early 2019 Seeding into existing seagrass patches for Posidonia species trial

Sites chosen for small scale pilot of Amphibolis seagrass

Mid 2019 Hessian bag deployment at up to 15 pilot sites for Amphibolis species restoration

Summer 2019/20

Collecting fruits from beach for Posidonia species trial

Early 2020 Tank trials to investigate Posidonia growth factors

Seeding Posidonia into new/ existing patches of Amphibolis

Best sites chosen for large scale restoration of Amphibolis species

Mid 2020

Mass hessian bag deployment for Amphibolis species restoration

Ongoing monitoring

Early-mid 2021

Continue tank trials to investigate Posidonia growth factors

Assess initial establishmer of Amphibolis species on hessian bags

Mid-late 2021 Report on project outcom

2019

ernment of South Australia Pepartment for Environment

2021
