## SOUTHERN SOUTH AUSTRALIA

### ACID SULFATE SOIL POTENTIAL

Classes are based on an interpretation of soil landscape map units which are classified according to the proportion of area susceptible to the development of acid sulfate soils.

Proportion of land susceptible to the development of acid sulfate soils

Incomplete data (usually wet inland areas)

Not applicable

#### NOTES ON USE OF THE MAP:

1. This information is derived from limited field inspection, and is subject to change without notice.
2. Boundaries between mapping units should be treated as transition zones.
3. The map is intended to provide a regional overview and should not be used to draw conclusions about conditions at specific locations.
4. Under no circumstances must the scale of the map be enlarged beyond its scale of mapping.
5. Advice from DEWNR Soil and Land Program should be sought prior to using this information for commercial decision making.
6. Under no circumstances may the data or information associated with this map or any accompanying report be altered in any way without the express permission of DEWNR Soil and Land Program.
