## SOUTHERN SOUTH AUSTRALIA

### STRUCTURE OF SUBSOIL (degree of limitation)

Classes are based on an interpretation of soil landscape map units which may include two or more contrasting land types with differing subsoil conditions. Map units are classified according to the most limiting subsoil structure condition, provided that it accounts for more than 30% of the area. Limited occurrences of sub-optimal subsoil structure are indicated as subclasses.

#### Degree of limitation due to subsoil structure

- Low
- Low with 10 - 30% moderately low to moderate
- Moderately low
- Low to moderately low, with 10 - 30% moderate to very high
- Moderate
- High
- Very high
- Not applicable

#### NOTES ON USE OF THE MAP:

1. This information is derived from limited field inspection, and is subject to change without notice.
2. Boundaries between mapping units should be treated as transition zones.
3. The map is intended to provide a regional overview and should not be used to draw conclusions about conditions at specific locations.
4. Under no circumstances must the scale of the map be enlarged beyond its scale of mapping.
5. Advice from DEWNR Soil and Land Program should be sought prior to using this information for commercial decision making.
6. Under no circumstances may the data or information associated with this map or any accompanying report be altered in any way without the express permission of DEWNR Soil and Land Program.
