## SOUTHERN SOUTH AUSTRALIA

### WATER EROSION POTENTIAL

This assessment is based on the potential for sheet and rill erosion, interpreted from slope and erodibility of soil landscape map units. Map units are classified according to the dominant water erosion potential class occurring. No account is taken of land cover or land use - ie the assessment is made on the inherent characteristics of the land.

Low	No special management needed
Moderately low	Modified surface management needed
Moderate	Engineered works needed
Moderately high	Semi arable
High	Non arable
Very high	Non arable, not traversable
Extreme	Non productive
Not applicable	

#### NOTES ON USE OF THE MAP:

1. This information is derived from limited field inspection, and is subject to change without notice.
2. Boundaries between mapping units should be treated as transition zones.
3. The map is intended to provide a regional overview and should not be used to draw conclusions about conditions at specific locations.
4. Under no circumstances must the scale of the map be enlarged beyond its scale of mapping.
5. Advice from DEWNR Soil and Land Program should be sought prior to using this information for commercial decision making.
6. Under no circumstances may the data or information associated with this map or any accompanying report be altered in any way without the express permission of DEWNR Soil and Land Program.
